

## WAREWASHING CHEMICALS

- **FREE** DELIVERY in Norfolk, Suffolk and Cambs.
- **FREE** use and troubleshooting guides on request
- **MIX 'N' MATCH** products in a case

Through running our own service operation, we have experienced over time many unnecessary service callouts resulting from sub-standard or inappropriate chemicals being used. This is inconsistent with our mission of providing you value for money and so we have developed our own premium quality range

**WARNING:** as with all chemicals, you must follow the safety instructions for correct handling, storage and use of our cleaning products. [CONTACT US](#) if you require any COSHH sheets for our range of chemicals. You will automatically be sent the relevant sheets the first time you buy a particular product from us.

### Force HW - Machine Dishwash Detergent

A liquid machine dishwash detergent formulated to work in both hard and soft water areas. The high sequestrant level helps to prevent scale formation.

Uses: Use with automatic dosing equipment or manual feed to clean cutlery, crockery and utensils (not aluminium) in all machine dishwash operations.

**Container size:** 5 litres      **Price:** £10.50

**Container size:** 25 litres      **Price:** £38.00

### Glisten Auto Glasswash Detergent

A liquid detergent specially formulated for enclosed glass washing machines. Leaves glasses sparkling clean and taint free. Soaks away unsightly stains from crockery and utensils.

Uses: Use with automatic dosing to clean glassware in all enclosed cabinet machines. This non foaming formulation rapidly breaks down sticky juices and lipstick to leave glasses clean and bright.

**Container size:** 5 litres      **Price:** £10.50

**Container size:** 25 litres      **Price:** £38.00

## Image Pink – Rinse Aid

A rinse aid formulated for injecting into the final rinse water of dish and glass washing machines to promote the rapid drying of crockery, glassware etc. without blooming, spotting or streaking. The pink pigment is used to differentiate not only from your detergent but also other products which can cause problems – for instance glass renovators - ensuring you don't make any unnecessary service calls!

Uses: Use with automatic dosing equipment to ensure injection into final rinse water in both dish and glass wash machines.

**Container size:** 5 litres      **Price:** £16.00

**Container size:** 25 litres      **Price:** £48.00

## Fat-Solve - Fryer Cleaner

A fully biodegradable detergent, fat-Solve rapidly breaks down oils and fats of animal, vegetable and mineral base and hardened soil residues. It is compatible with most metals, including aluminium, plastics and rubber.

**Container size:** 5 litres      **Price:** £12.50

## Renovate Liquid – Glass and Cup Renovator

Suitable for use in all cabinet machines with automatic chemical injection.

Specially formulated to remove beer residues and protein deposits from drinking glasses and tannin build-up in cups and mugs. Suitable for use in hard, soft or softened water. Restores sound glasses to their original condition in one step. (please note it will not rejuvenate glasses which have become etched). Removes build-ups of deposits on cups and mugs to eliminate tannin stains sticking.

**Container size:** 5 litres      **Price:** £12.55

## Water softener salt

East Anglia water is among the hardest in the country and limescale is very damaging to your machine and your pocket, causing inefficient operation, poor results, greatly increased risk of breakdown and shortened working life. It is essential the water to your machine is softened and equally importantly, regenerated with salt regularly as required.

**IMPORTANT:** Please ensure you use the correct type for your softener:

**For MANUAL softeners, use granules:** 25kg bag      **Price:** £9.50

**For AUTOMATIC softeners, use tablets:** 25kg bag      **Price:** £9.50

Prices quoted exclude VAT and are for products order in 4x5 litre cases or 1 x 25 litre drums
